➤ LATEST MULTIPLE-SLIDE TECHNOLOGY

## FOR ALL MODEL H, NT, NTX SERIES

- Mold lubrication with individual Micro Pump metering device.
  - Very precise metering device system with each pump capable of delivering 1.5 to 41 cubic mm.
  - More robust system: copper end piping mounted on a magnetic fixture makes it easy to fix in place.
  - Lubricant and air mixed together by a nozzle spray head.
  - Possible to adjust the mist by reducing the air pressure and the volume of lubricant.
  - Lubricant reservoirs of 1 to 6 liter available.
  - Possible to refill while the machine is cycling. This action will not affect production.
