die casting solutions

➤ LATEST MULTIPLE-SLIDE TECHNOLOGY

## FOR ALL MODEL H, NT, NTX SERIES

- Controller Upgrade NT2 for Model Series H or a replacement controller for NT machine.
  - PC Based touch screen control cabinet for replacing outdated H-Series cabinet or NT's. – Looks like a NT – similar Techmire program.
  - The NT2 controller has a NT frame, NT computer, same look as a the original and standard NT controller - No learning curve needed – Keep one technique.
  - Can also run on conventional die casting machines – not only Techmire.
  - Provides alarm screens and proposes rapid problem solutions onthe screen. The machine H reacts like a NT.
  - Kit is assembled at the customer location . No need to send the machine to Techmire.
  - The Process Parameter Control System can be retrofit as an option , see PPCS.
  - Provides an alternative to owners of older equipment to update their techniques and achieve faster turnaround with better quality.
