## FOR MODEL 22NT

Machine conversion from 22NT clamping system into a 22-24NTX

- Provides more space for cavity. Die block size increases from 4 inch<sup>2</sup> / 2580 mm<sup>2</sup> up to 10.0 inch<sup>2</sup> / 6500mm<sup>2</sup>
- Clamping force upgrade to 7.9 -10 tons (us) / 7.2 – 9.1 metric ton
- Provides increased resistance to hold and seal the mold at the parting line.
- Changes made only to the front of the machine.
- Takes less than four (4) days to install.
- Kit is assembled at customer location . No need to ship the machine to Techmire.
- Kit comes with all four (4) model 24 toggles, links and cylinders mounted on a new machine platen with the reinforcement ring.
