## FOR 44 MODEL H , NT SERIES

Machine conversion kit from 44 toggle system into a 44LCX , with ring with locking cylinders.

- Provides more clamping power and holds pressure in center of the die halves.
- Tougher resistance to hold and seal the mold at the parting line.
- Package includes all (4) functions: cylinders, links and reinforcement ring on a platen.
- Changes made only to the front of the machine.
- Machine conversion kit assembled at the customer location.
- NO NEED to change mold or shanks design. Fully compatible with 44H and 44NT.
- New crosshead and front guard is an option.
