

## FOR ALL MODEL H, NT, NTX SERIES

➤ Mold lubrication with individual Micro Pump metering device.

- Very precise metering device system and Each pump deliver 1.5 to 41 cubic mm.

- More robust system, copper end piping mounted on a Magnet fixture, easy to fix in place.

- Lubricant and air mixed together by a nozzle spray head.

- Possible to adjust the mist by reducing the air pressure and the volume of lubricant.

- Lubricant reservoir of 1 to 6 liter available.

- Possible to refill while the machine is cycling. This action will not affect production.
